▼ 页面设计

index.html (主页)

search.html

details.html

login.html

register.html

....

▼ 应用技术

1. 加盐salt

```
$hash = password_hash($password, PASSWORD_BCRYPT);
```

2. 交互：ajax，xhr，fetch

▼ 部署

部署在了XAMPP上, 前后端共用localhost端口

▼ 4. SQL技术

可以使用SQL语句方便操作表

```
-- 选择所有 ArtistID 和对应的 Name
SELECT artwork.ArtistID, artists.FirstName, artists.LastName
FROM artwork
JOIN artists ON artwork.ArtistID = artists.ArtistID;

-- 将结果插入到 artwork 表中
ALTER TABLE artwork
ADD COLUMN FirstName VARCHAR(255) AFTER ArtistID,
ADD COLUMN LastName VARCHAR(255) AFTER FirstName;

UPDATE artwork
JOIN artists ON artwork.ArtistID = artists.ArtistID
SET artwork.FirstName = artists.FirstName,
    artwork.LastName = artists.LastName;
```

```
-- 添加 Author 字段
ALTER TABLE artwork ADD COLUMN Author VARCHAR(255);

-- 更新 Author 字段
UPDATE artwork SET Author = CONCAT(FirstName, ' ', LastName);
```

```
UPDATE artwork SET Visited = 0;
```

▼ 感想

1. 挺赶的时间，没有做很多，但是学到很多
2. 我使用GPT和SAGE, CLAUDE写了很多. 如果没有人工智能更难了

3. 总的来说这学期学的不是很严肃认真, 希望之后继续努力吧!
